This volume makes such knowledge available to any reader: For each family, there is a distribution map with the breeding, non-breeding and year-round ranges, standardized descriptions of the appearance, summaries of diet and feeding behavior, breeding biology, conservation status, and an up-to-date summary of the state of knowledge of relationships. The work is liberally illustrated with photographs from bird enthusiasts around the globe as well as paintings of one species from each of the genera in each family. Whether you are a birder with an interest in global bird diversity or a professional ornithologist, this beautiful and serviceable guide will provide a mental map to help you organize your experiences and observations.
