## **Knowledge from the Stars** Wesley H. Bateman

In this book, the author of *Dragons and Chariots* and *Through Alien Eyes* shares his thirty-year adventure as a "Federation telepath" and the wisdom brought to Earth through his telepathic connections. Anyone interested in subjects ranging from UFOs to mathematics and astrophysics should be intrigued by the work of the amazing Wesley H. Bateman, Federation telepath. Wes held a PhD in mathematics and was one of the originators of the ideas of wormholes, warp-drive, and cloaking devices. Wes was fascinated by the pyramids of Egypt and gave us the RA system of mathematics that he developed while studying the Great Pyramid in relation to the volumes of material that he received telepathically from alien contacts.

In the 1950s and early 1960s, Wes was a pioneer in the UFO research field. After decades of silence and no media contact, he finally went on record about how his experiences and ideas were passed along to Gene Roddenberry, who subsequently incorporated a number of the ideas that Wes had proposed into the famous Star Trek television and movie series. These ideas include the Federation itself, warp drive, and the prime directive.

Mr. Bateman made a clear distinction between his telepathic communications, in which information was exchanged with various extraterrestrial physical beings, and the channeling process wherein the energy or spirit of another being comes into the channel's body and speaks through him or her.

Wesley H. Bateman passed on February 13, 2009.
