**Agriculture at a Crossroads: Volume III: Latin America and the Caribbean** Science, and Technology International Assessment of Agricultural Knowledge

The International Assessment of Agricultural Knowledge, Science, and Technology for Development (IAASTD) looks realistically at how we could effectively use agriculture/AKST to help us meet development and sustainability goals. An unprecedented three-year collaborative effort, the IAASTD involved more than 400 authors in 110 countries and cost more than \$11 million. It reports on the advances and setbacks of the past fifty years and offers options for the next fifty years.

The results of the project are contained in seven reports: a Global Report, five regional Sub-Global Assessments, and a Synthesis Report. The *Global Report* gives the key findings of the Assessment, and the five *Sub-Global Assessments* address regional challenges. The volumes present options for action. All of the reports have been extensively peer-reviewed by governments and experts and all have been approved by a panel of participating governments. The Sub-Global Assessments all utilize a similar and consistent framework: examining and reporting on the impacts of AKST on hunger, poverty, nutrition, human health, and environmental/social sustainability. The five *Sub-Global Assessments* cover the following regions:

- Central and West Asia and North Africa (CWANA)
- East and South Asia and the Pacific (ESAP)
- Latin America and the Caribbean (LAC)
- North America and Europe (NAE)
- Sub-Saharan Africa (SSA)
