Immemory: A cd-rom by Chris Marker

Filmmaker, photographer, writer and traveler Chris Marker has never respected the boundaries between genres. His landmark 1962 film *La Jetée* is made up almost entirely of stills, its one moving image as thrilling as the Lumières' films must have been for their original audiences. Since then, Marker's films (including the features *Sans Soleil*, and most recently *Level Five*) have continued to stretch the definition of the art, merging at times with the essay, political manifesto, personal letter, art installation, even the computer game. In *Immemory*, Chris Marker has used the format of the CD-Rom to create a multi-layered, multimedia memoir. The reader investigates "zones" of travel, war, cinema and poetry, navigating through photographs, film clips, music and text, as if physically exploring Marker's memory itself. The result is a veritable twenty-first-century *Remembrance of Things Past*, an exploration of the state of memory in our digital era. With it, Marker has both invented a literary form and perfected it. System Requirements: For Macintosh computers running System 7.5 through Mac OS 9 (including the "Classic environment" of Mac OS X)
