Principles and Practice of Structural Equation Modeling, Fourth Edition (Methodology in the Social Sciences)

Rex B. Kline PhD

Principles and Practice of Structural Equation Modeling, Fourth Edition (Methodology in the Social Sciences) Rex B. Kline PhD

Emphasizing concepts and rationale over mathematical minutiae, this is the most widely used, complete, and accessible structural equation modeling (SEM) text. Continuing the tradition of using real data examples from a variety of disciplines, the significantly revised fourth edition incorporates recent developments such as Pearl's graphing theory and the structural causal model (SCM), measurement invariance, and more. Readers gain a comprehensive understanding of all phases of SEM, from data collection and screening to the interpretation and reporting of the results. Learning is enhanced by exercises with answers, rules to remember, and topic boxes. The companion website supplies data, syntax, and output for the book's examples--now including files for Amos, EQS, LISREL, Mplus, Stata, and R (lavaan).

New to This Edition

- *Extensively revised to cover important new topics: Pearl's graphing theory and the SCM, causal inference frameworks, conditional process modeling, path models for longitudinal data, item response theory, and more.
- *Chapters on best practices in all stages of SEM, measurement invariance in confirmatory factor analysis, and significance testing issues and bootstrapping.
- *Expanded coverage of psychometrics.
- *Additional computer tools: online files for all detailed examples, previously provided in EQS, LISREL, and Mplus, are now also given in Amos, Stata, and R (lavaan).
- *Reorganized to cover the specification, identification, and analysis of observed variable models separately from latent variable models.

Pedagogical Features

- *Exercises with answers, plus end-of-chapter annotated lists of further reading.
- *Real examples of troublesome data, demonstrating how to handle typical problems in analyses.
- *Topic boxes on specialized issues, such as causes of nonpositive definite correlations.
- *Boxed rules to remember.
- *Website promoting a learn-by-doing approach, including syntax and data files for six widely used SEM computer tools.

From reader reviews:

James Brown:

Book is usually written, printed, or illustrated for everything. You can recognize everything you want by a publication. Book has a different type. To be sure that book is important matter to bring us around the world. Beside that you can your reading expertise was fluently. A reserve Principles and Practice of Structural Equation Modeling, Fourth Edition (Methodology in the Social Sciences) will make you to end up being smarter. You can feel considerably more confidence if you can know about every thing. But some of you think that open or reading a book make you bored. It isn't make you fun. Why they can be thought like that? Have you seeking best book or acceptable book with you?

Cornell Smith:

Do you really one of the book lovers? If yes, do you ever feeling doubt when you find yourself in the book store? Attempt to pick one book that you find out the inside because don't determine book by its cover may doesn't work the following is difficult job because you are afraid that the inside maybe not seeing that fantastic as in the outside appearance likes. Maybe you answer may be Principles and Practice of Structural Equation Modeling, Fourth Edition (Methodology in the Social Sciences) why because the amazing cover that make you consider about the content will not disappoint you actually. The inside or content will be fantastic as the outside as well as cover. Your reading 6th sense will directly make suggestions to pick up this book.

Colby Tapia:

Is it you who having spare time and then spend it whole day by simply watching television programs or just lying on the bed? Do you need something new? This Principles and Practice of Structural Equation Modeling, Fourth Edition (Methodology in the Social Sciences) can be the answer, oh how comes? A fresh book you know. You are therefore out of date, spending your extra time by reading in this new era is common not a geek activity. So what these guides have than the others?

Michele Williams:

Book is one of source of know-how. We can add our knowledge from it. Not only for students but also native or citizen require book to know the change information of year to year. As we know those books have many advantages. Beside we add our knowledge, can also bring us to around the world. Through the book Principles and Practice of Structural Equation Modeling, Fourth Edition (Methodology in the Social Sciences) we can have more advantage. Don't one to be creative people? To become creative person must want to read a book. Only choose the best book that suitable with your aim. Don't be doubt to change your life with that book Principles and Practice of Structural Equation Modeling, Fourth Edition (Methodology in the Social Sciences). You can more attractive than now.
