Consciousness Is Fractal and Exponential in Nature Landon Stuart Larkey

Fractal Thoughts This means that when you focus on ONE thought just one... OVER and OVER and OVER you are fractaling that thought. You must focus on just ONE thing over and over. And when you do this, that fractal thoughts become more fundamental and more energetic. It has to do with repeating patterns. A fractal is a repeating pattern that is reduced in size when it is repeated and thus it becomes more energetic. When you fractal a thought you are exponentially making it more energetic and therefore more meaningful as well! As you focus and fractal a thought, you are accessing higher states of reality and energy. The more you fractal a thought, the more you have a relationship with that energy and that part of the universe. In the movie Phenomenon, Travolta's character says it's more like a relationship when he was making the pencil move, which is exactly what it is! But there's more; this is just the beginning. This is the greatest secret of all time! You can now know how to do miracles.
