Introduction to Machine Learning (Research Notes in Artificial Intelligence)

Yves Kodratoff

Introduction to Machine Learning (Research Notes in Artificial Intelligence) Yves Kodratoff

A textbook suitable for undergraduate courses in machine learning and related topics, this book provides a broad survey of the field. Generous exercises and examples give students a firm grasp of the concepts and techniques of this rapidly developing, challenging subject.

Introduction to Machine Learning synthesizes and clarifies the work of leading researchers, much of which is otherwise available only in undigested technical reports, journals, and conference proceedings. Beginning with an overview suitable for undergraduate readers, Kodratoff establishes a theoretical basis for machine learning and describes its technical concepts and major application areas. Relevant logic programming examples are given in Prolog.

Introduction to Machine Learning is an accessible and original introduction to a significant research area.
