Optimization by GRASP: Greedy Randomized Adaptive Search Procedures

Mauricio G.C. Resende, Celso C. Ribeiro

Optimization by GRASP: Greedy Randomized Adaptive Search Procedures Mauricio G.C. Resende, Celso C. Ribeiro

This is the first book to cover GRASP (Greedy Randomized Adaptive Search Procedures), a metaheuristic that has enjoyed wide success in practice with a broad range of applications to real-world combinatorial optimization problems. The state-of-the-art coverage and carefully crafted pedagogical style lends this book highly accessible as an introductory text not only to GRASP, but also to combinatorial optimization, greedy algorithms, local search, and path-relinking, as well as to heuristics and metaheuristics, in general. The focus is on algorithmic and computational aspects of applied optimization with GRASP with emphasis given to the end-user, providing sufficient information on the broad spectrum of advances in applied optimization with GRASP. For the more advanced reader, chapters on hybridization with path-relinking and parallel and continuous GRASP present these topics in a clear and concise fashion. Additionally, the book offers a very complete annotated bibliography of GRASP and combinatorial optimization. For the practitioner who needs to solve combinatorial optimization problems, the book provides a chapter with four case studies and implementable templates for all algorithms covered in the text. This book, with its excellent overview of GRASP, will appeal to researchers and practitioners of combinatorial optimization who have a need to find optimal or near optimal solutions to hard combinatorial optimization problems.

From reader reviews:

Cory Marshall:

As people who live in the modest era should be revise about what going on or information even knowledge to make these keep up with the era which is always change and advance. Some of you maybe can update themselves by reading books. It is a good choice for you personally but the problems coming to you is you don't know what kind you should start with. This Optimization by GRASP: Greedy Randomized Adaptive Search Procedures is our recommendation to cause you to keep up with the world. Why, since this book serves what you want and need in this era.

Raymond Llamas:

The experience that you get from Optimization by GRASP: Greedy Randomized Adaptive Search Procedures is the more deep you searching the information that hide in the words the more you get considering reading it. It does not mean that this book is hard to be aware of but Optimization by GRASP: Greedy Randomized Adaptive Search Procedures giving you thrill feeling of reading. The article writer conveys their point in particular way that can be understood simply by anyone who read that because the author of this e-book is well-known enough. This particular book also makes your own personal vocabulary increase well. Therefore it is easy to understand then can go along with you, both in printed or e-book style are available. We advise you for having this particular Optimization by GRASP: Greedy Randomized Adaptive Search Procedures instantly.

Lauren Cook:

Spent a free a chance to be fun activity to perform! A lot of people spent their sparetime with their family, or their friends. Usually they accomplishing activity like watching television, likely to beach, or picnic inside the park. They actually doing ditto every week. Do you feel it? Would you like to something different to fill your own personal free time/ holiday? Might be reading a book might be option to fill your free time/ holiday. The first thing you will ask may be what kinds of e-book that you should read. If you want to test look for book, may be the publication untitled Optimization by GRASP: Greedy Randomized Adaptive Search Procedures can be excellent book to read. May be it might be best activity to you.

Jeffery Bruce:

Do you have something that you want such as book? The e-book lovers usually prefer to select book like comic, brief story and the biggest one is novel. Now, why not hoping Optimization by GRASP: Greedy Randomized Adaptive Search Procedures that give your entertainment preference will be satisfied by means of reading this book. Reading addiction all over the world can be said as the opportunity for people to know world much better then how they react to the world. It can't be mentioned constantly that reading practice only for the geeky individual but for all of you who wants to be success person. So , for every you who want to start looking at as your good habit, you are able to pick Optimization by GRASP: Greedy Randomized

Adaptive Search Procedures become your personal starter.
