"Rarely does a gardening book raise eyebrows, let alone hell." -Diana Morse

Fire the Landscaper is a biting critique of current landscape design and maintenance practices. The book explores the health risks, cultural biases, origins, and the insults to Mother Nature caused by our culturally backed, legally enforced obsession with artificial representations of nature.

The author, Phil Williams, is a former owner of a successful lawn and landscape company. He exposes the waste, fraud, and downright ridiculousness of an industry focused solely on aesthetics. Through his subsequent training as a permaculture designer, he offers many practical solutions aligned with nature to increase the health and productivity of landscapes, and the world by extension, while simultaneously reducing the workload of upkeep.
