Maple and Mathematica: A Problem Solving Approach for Mathematics Inna K. Shingareva, Carlos Lizárraga-Celaya

In the history of mathematics there are many situations in which calculations were performed incorrectly for important practical applications. Let us look at some examples, the history of computing the number π began in Egypt and Babylon about 2000 years BC, since then many mathematicians have calculated π (e. g. , Archimedes, Ptolemy, Viète, etc.). The first formula for computing decimal digits of π was discovered by J. Machin (in 1706), who was the first to correctly compute 100 digits of π . Then many people used his method, e. g. , W. Shanks calculated π with 707 digits (within 15 years), although due to mistakes only the first 527 were correct. For the next examples, we can mention the history of computing the fine-structure constant α (that was first discovered by A. Sommerfeld), and the mathematical tables, exact solutions, and formulas, published in many mathematical textbooks, were not verified rigorously [25]. These errors could have a large effect on results obtained by engineers. But sometimes, the solution of such problems required such technology that was not available at that time. In modern mathematics there exist computers that can perform various mathematical operations for which humans are incapable. Therefore the computers can be used to verify the results obtained by humans, to discover new results, to prove the results that a human can obtain without any technology. With respect to our example of computing π , we can mention that recently (in 2002) Y. Kanada, Y. Ushiro, H. Kuroda, and M.

From reader reviews:

Timothy Parker:

Book will be written, printed, or outlined for everything. You can learn everything you want by a publication. Book has a different type. We all know that that book is important issue to bring us around the world. Adjacent to that you can your reading ability was fluently. A e-book Maple and Mathematica: A Problem Solving Approach for Mathematics will make you to always be smarter. You can feel more confidence if you can know about every little thing. But some of you think which open or reading a new book make you bored. It isn't make you fun. Why they might be thought like that? Have you in search of best book or suitable book with you?

Stephen Hill:

This Maple and Mathematica: A Problem Solving Approach for Mathematics are usually reliable for you who want to certainly be a successful person, why. The reason of this Maple and Mathematica: A Problem Solving Approach for Mathematics can be one of the great books you must have is actually giving you more than just simple reading food but feed an individual with information that perhaps will shock your earlier knowledge. This book is actually handy, you can bring it everywhere you go and whenever your conditions at e-book and printed types. Beside that this Maple and Mathematica: A Problem Solving Approach for Mathematics giving you an enormous of experience including rich vocabulary, giving you tryout of critical thinking that we all know it useful in your day pastime. So , let's have it and luxuriate in reading.

Jacki Peters:

Reading a book for being new life style in this season; every people loves to read a book. When you read a book you can get a great deal of benefit. When you read textbooks, you can improve your knowledge, since book has a lot of information upon it. The information that you will get depend on what sorts of book that you have read. If you would like get information about your examine, you can read education books, but if you act like you want to entertain yourself look for a fiction books, such us novel, comics, in addition to soon. The Maple and Mathematica: A Problem Solving Approach for Mathematics will give you a new experience in reading through a book.

William Johnson:

In this era which is the greater man or woman or who has ability in doing something more are more special than other. Do you want to become certainly one of it? It is just simple method to have that. What you need to do is just spending your time almost no but quite enough to get a look at some books. On the list of books in the top collection in your reading list will be Maple and Mathematica: A Problem Solving Approach for Mathematics. This book which can be qualified as The Hungry Inclines can get you closer in growing to be precious person. By looking up and review this reserve you can get many advantages.
