Mathematical Evolutionary Theory (Princeton Legacy Library)

Marcus W. Feldman

Mathematical Evolutionary Theory (Princeton Legacy Library) Marcus W. Feldman

An international group of distinguished scientists presents an up-to-date survey of quantitative problems at the forefront of modern evolutionary theory. Their articles illustrate results from the latest research in population and behavioral genetics, molecular evolution, and ecology. Each author gives careful attention to the exposition of the models, the logic of their analysis, and the legitimacy of qualitative biological inferences. The topics covered include stochastic models of finite populations and the sorts of diffusion approximations that are valid for their study, models of migration, kin selection, geneculture coevolution, sexual selection, life-history evolution, the statistics of linkage disequilibrium, and the molecular evolution of repeated DNA sequences and the HLA system in humans.

The fourteen contributions are presented in two sections: Part I, Stochastic and Deterministic Genetic Theory, and Part II, Behavior, Ecology, and Evolutionary Genetics. Marcus W. Feldman provides an introduction to each part. The contributors are J. G. Bodmer, W. F. Bodmer, L. L. Cavalli Sforza, F. B. Christiansen, C. Cockerham, W. J. Ewens, M. W. Feldman, J. H. Gillespie, R. R. Hudson, N. L. Kaplan, S. Lessard, U. Liberman, M.E.N. Majerus, P. O'Donald, J. Roughgarden, S. Tavar, M. K. Uyenoyama, G. A. Watterson, and B. Weir.

Originally published in 1989.

The **Princeton Legacy Library** uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These paperback editions preserve the original texts of these important books while presenting them in durable paperback editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

From reader reviews:

Carla Floyd:

Now a day those who Living in the era where everything reachable by talk with the internet and the resources within it can be true or not require people to be aware of each data they get. How a lot more to be smart in receiving any information nowadays? Of course the answer is reading a book. Examining a book can help people out of this uncertainty Information particularly this Mathematical Evolutionary Theory (Princeton Legacy Library) book since this book offers you rich data and knowledge. Of course the information in this book hundred per-cent guarantees there is no doubt in it everbody knows.

Janet Warren:

Typically the book Mathematical Evolutionary Theory (Princeton Legacy Library) will bring you to the new experience of reading any book. The author style to elucidate the idea is very unique. If you try to find new book you just read, this book very acceptable to you. The book Mathematical Evolutionary Theory (Princeton Legacy Library) is much recommended to you you just read. You can also get the e-book from official web site, so you can quickly to read the book.

David Packard:

Don't be worry should you be afraid that this book may filled the space in your house, you can have it in e-book approach, more simple and reachable. That Mathematical Evolutionary Theory (Princeton Legacy Library) can give you a lot of buddies because by you looking at this one book you have matter that they don't and make an individual more like an interesting person. This book can be one of a step for you to get success. This e-book offer you information that might be your friend doesn't learn, by knowing more than other make you to be great individuals. So , why hesitate? Let's have Mathematical Evolutionary Theory (Princeton Legacy Library).

Cynthia Barksdale:

Reading a book make you to get more knowledge from it. You can take knowledge and information coming from a book. Book is composed or printed or highlighted from each source which filled update of news. With this modern era like currently, many ways to get information are available for you actually. From media social similar to newspaper, magazines, science reserve, encyclopedia, reference book, new and comic. You can add your knowledge by that book. Ready to spend your spare time to open your book? Or just searching for the Mathematical Evolutionary Theory (Princeton Legacy Library) when you essential it?
