What *Stiff* did for the dead and *Fast Food Nation* did for the burger, *Dog, Inc.* does for the stranger-than-fiction world of commercial dog cloning.

It all began with a pit bull named Booger. Former Miss Wyoming Bernann McKinney was so distraught over the death of her dog, whom she regarded as her guardian and savior, that she paid \$50,000 to RNL Bio for the chance to bring her beloved companion back to life. The result was a litter of five Boogers-the first successful commercial cloning of a canine-delivered in 2008, along with a slew of compelling questions about the boundaries of science, commerce, and ethics. Blending shocking investigative reporting with colorful anecdotes, Pulitzer Prize-winning John Woestendiek takes readers behind the scenes of this emerging industry.

But *Dog, Inc.* isn't just a book about pets. Nor is it just a book about science. Rather it's a fascinating look at how our emotional needs are bending the reaches of science and technology, as well as a study of this uncharted territory.
