Big Data 2.0 Processing Systems: A Survey (SpringerBriefs in Computer Science) Sakr

This book provides readers the “big picture” and a comprehensive survey of the domain of big data processing systems. For the past decade, the Hadoop framework has dominated the world of big data processing, yet recently academia and industry have started to recognize its limitations in several application domains and big data processing scenarios such as the large-scale processing of structured data, graph data and streaming data. Thus, it is now gradually being replaced by a collection of engines that are dedicated to specific verticals (e.g. structured data, graph data, and streaming data). The book explores this new wave of systems, which it refers to as Big Data 2.0 processing systems.

After Chapter 1 presents the general background of the big data phenomena, Chapter 2 provides an overview of various general-purpose big data processing systems that allow their users to develop various big data processing jobs for different application domains. In turn, Chapter 3 examines various systems that have been introduced to support the SQL flavor on top of the Hadoop infrastructure and provide competing and scalable performance in the processing of large-scale structured data. Chapter 4 discusses several systems that have been designed to tackle the problem of large-scale graph processing, while the main focus of Chapter 5 is on several systems that have been designed to provide scalable solutions for processing big data streams, and on other sets of systems that have been introduced to support the development of data pipelines between various types of big data processing jobs and systems. Lastly, Chapter 6 shares conclusions and an outlook on future research challenges.

Overall, the book offers a valuable reference guide for students, researchers and professionals in the domain of big data processing systems. Further, its comprehensive content will hopefully encourage readers to pursue further research on the subject.

From reader reviews:

Bertha Underwood:

What do you regarding book? It is not important along with you? Or just adding material when you need something to explain what the one you have problem? How about your extra time? Or are you busy man? If you don't have spare time to accomplish others business, it is make you feel bored faster. And you have spare time? What did you do? Everybody has many questions above. The doctor has to answer that question mainly because just their can do that. It said that about e-book. Book is familiar in each person. Yes, it is suitable. Because start from on guardería until university need this kind of Big Data 2.0 Processing Systems: A Survey (SpringerBriefs in Computer Science) to read.

Helen McCleary:

Hey guys, do you wants to finds a new book to read? May be the book with the name Big Data 2.0 Processing Systems: A Survey (SpringerBriefs in Computer Science) suitable to you? The book was written by well-known writer in this era. The particular book untitled Big Data 2.0 Processing Systems: A Survey (SpringerBriefs in Computer Science)is the main of several books that everyone read now. This book was inspired lots of people in the world. When you read this book you will enter the new dimensions that you ever know prior to. The author explained their strategy in the simple way, therefore all of people can easily to know the core of this reserve. This book will give you a lots of information about this world now. So you can see the represented of the world in this book.

Janice Wilham:

Are you kind of busy person, only have 10 or perhaps 15 minute in your time to upgrading your mind skill or thinking skill even analytical thinking? Then you have problem with the book as compared to can satisfy your short time to read it because pretty much everything time you only find guide that need more time to be learn. Big Data 2.0 Processing Systems: A Survey (SpringerBriefs in Computer Science) can be your answer as it can be read by an individual who have those short free time problems.

Bonnie Howe:

With this era which is the greater individual or who has ability to do something more are more valuable than other. Do you want to become among it? It is just simple approach to have that. What you are related is just spending your time not much but quite enough to possess a look at some books. One of many books in the top checklist in your reading list is actually Big Data 2.0 Processing Systems: A Survey (SpringerBriefs in Computer Science). This book which is qualified as The Hungry Slopes can get you closer in turning into precious person. By looking right up and review this guide you can get many advantages.
