Shielded Metal Arc Welding

John R. Walker, W. Richard Polanin

Shielded Metal Arc Welding John R. Walker, W. Richard Polanin

Shielded Metal Arc Welding is a write-in text that progresses from basic theory to specialized techniques. It focuses on the shielded metal arc welding (SMAW) process. A unit on welding problems provides solutions that students can use when they encounter an issue. This text prepares students for the Written Knowledge and Workmanship Performance Tests for Module 4 of AWS SENSE Level I – Entry Welder certification.

- Write-in format allows students to work at their own pace and instructors to easily monitor student progress and comprehension.
- Many content updates added for this edition, including additional fire safety and protection content; information on unclassified electrodes and welding positions; information on filler metal content, weld penetration, voltage polarity, low hydrogen electrodes, and deposit rate; and new information on nondestructive testing, destructive testing, and the responsibilities of a welding inspector.
