Mat Ryer

Go Programming Blueprints - Solving Development Challenges with Golang Mat Ryer

Key Features

- Learn to apply the nuances of the Go language, and get to know the open source community that surrounds it to implement a wide range of start-up quality projects
- Write interesting, and clever but simple code, and learn skills and techniques that are directly transferrable to your own projects
- Discover how to write code capable of delivering massive world-class scale performance and availability

Book Description

Dive headfirst into solving actual enterprise problems and start cutting code from the word go. You will build complete applications around a variety of subjects using a range of different technologies and techniques, all of which are directly applicable to today's tech start-up world.

Scale, performance, and high availability lie at the heart of the projects, and the lessons learned throughout this book will arm you with everything you need to build world-class solutions. Well-designed applications and sensible architectures can scale horizontally to cope with the demands of up to millions of users, while avoiding the prohibitive up-front investment that can bring a project to its knees.

What you will Learn

- Build quirky and fun projects from scratch while exploring widely applicable skills, patterns, practices, and techniques, as well as a range of different technologies
- Create websites and data services capable of massive scale using Go's net/http package, exploring RESTful patterns as well as low-latency WebSocket APIs
- Interact with a variety of remote web services to consume capabilities ranging from authentication and authorization to a fully functioning thesaurus
- Develop high-quality command-line tools that utilize the powerful shell capabilities and have great performance using Go's in-built concurrency mechanisms
- Implement a modern document database as well as high-throughput messaging queue technology to put together an architecture that is truly ready for scale
- Write concurrent programs and gracefully manage their execution and communication with smart use of channels

About the Author

Mat Ryer has a family legend (or conspiracy) that tells of him programming computers from the age of 6—he and his father would build games and programs, first BASIC on a ZX Spectrum then later AmigaBASIC and AMOS on their Commodore Amiga. Many hours were spent manually copying out code from the Amiga Format magazine, before spending more still tweaking variables or moving GOTO statements around to see what might happen.The same spirit of exploration and obsession with programming led Mat to start work for a local agency in Mansfield, England, when he was 18, where he started to build

websites and services. After contracting around London for a few years, coding everything from C# and Objective-C to Ruby and JavaScript, Mat noticed a new systems language called Go that Google was pioneering. Because it addressed very pertinent and relevant modern technical challenges, Mat started using it to solve problems while the language was still in beta and he has used it ever since.

From reader reviews:

Ruby Sprankle:

Information is provisions for people to get better life, information today can get by anyone on everywhere. The information can be a understanding or any news even a problem. What people must be consider any time those information which is in the former life are difficult to be find than now could be taking seriously which one would work to believe or which one the actual resource are convinced. If you have the unstable resource then you buy it as your main information you will have huge disadvantage for you. All those possibilities will not happen with you if you take Go Programming Blueprints - Solving Development Challenges with Golang as the daily resource information.

Michael Jones:

Spent a free time for you to be fun activity to try and do! A lot of people spent their down time with their family, or their friends. Usually they undertaking activity like watching television, gonna beach, or picnic in the park. They actually doing same thing every week. Do you feel it? Will you something different to fill your personal free time/ holiday? Could possibly be reading a book is usually option to fill your cost-free time/ holiday. The first thing you will ask may be what kinds of guide that you should read. If you want to try out look for book, may be the reserve untitled Go Programming Blueprints - Solving Development Challenges with Golang can be very good book to read. May be it is usually best activity to you.

Darlene Heckart:

Are you kind of busy person, only have 10 or perhaps 15 minute in your day time to upgrading your mind expertise or thinking skill also analytical thinking? Then you are receiving problem with the book as compared to can satisfy your limited time to read it because this all time you only find publication that need more time to be examine. Go Programming Blueprints - Solving Development Challenges with Golang can be your answer since it can be read by you actually who have those short time problems.

Antonio Ritchie:

In this period globalization it is important to someone to acquire information. The information will make you to definitely understand the condition of the world. The health of the world makes the information much easier to share. You can find a lot of referrals to get information example: internet, newspaper, book, and soon. You can see that now, a lot of publisher that print many kinds of book. The particular book that recommended for your requirements is Go Programming Blueprints - Solving Development Challenges with Golang this e-book consist a lot of the information in the condition of this world now. This particular book was represented how do the world has grown up. The words styles that writer make usage of to explain it is easy to understand. The particular writer made some exploration when he makes this book. This is why this book ideal all of you.
