# The Unified Theory of the Universe and Everything

*Frank Barlow*

## **The Unified Theory of the Universe and Everything** Frank Barlow

Inspired by Albert Einstein, Frank Barlow has been writing technical articles for over thirty years. He answers some age-old questions in his new book *The Unified Theory of the Universe and Everything*; tackling questions that have been asked about the universe, life, the smallest particle, and the end of time, all are answered from a layman's perspective, using simple observations and a few revolutionary theories. Barlow asks: How did matter form? How have we and the galaxies evolved? Why is the universe expanding? When will it all end? Who are we and where do we fit in the big picture? He asserts that his statements and observations are all logically substantiated. His motivation came from a sudden realization of why the universe was expanding and everything within it. The same theory seemed to answer many additional questions about how the smallest possible particle could exist. He also answers questions that have been puzzling scientists, such as the dual nature of light, the nature of the universe, time, and even questions regarding our own thought process. Barlow says, "Everyone seems to have noticed that time is passing very quickly these days, weeks and months just seem to fly by." The book offers an explanation for this speeding up of time and its ultimate conclusion. *The Unified Theory of the Universe* will open your eyes and answer your questions. Born in England, Frank Barlow has lived most of his life in Johannesburg, South Africa. He is the managing director of a data communications company. Publisher's website:
