Information, Communication, and Space Technology

Mohammad Razani

Information, Communication, and Space Technology Mohammad Razani

Many books have covered the rapidly evolving fields of *information and communication technology* (ICT) and *space technology* separately. However, no single book has ever focused on how the integration of these two areas is creating a stronger platform for various scientific advancements?including some research work that cannot be performed on Earth.

To fill the void, **Information, Communication, and Space Technology** provides a novel illustration of that connection. Dividing content into sections that cover ICT, existing and future space technologies, and satellites, the author demonstrates the individual and combined power of each of these parts of the overall system. He explores how the combination of concepts from each of these interrelated fields is creating massive potential for broader advances in areas such as robotics, communications, navigation, agriculture, health care, and nanotechnology. The book introduces particular potential innovations, including "rocket-less" spacecraft launches, and development of a global system to balance energy distribution by using satellites that would collect solar energy and transmit it via microwave beams to different locations around the world.

Equally useful to students and professionals, this work is a culmination of the domestic and international experience that the author has acquired throughout more than three decades as an instructor and researcher. Emphasizing the strong need to incorporate ICT and space technology into the general university curriculum, the book starts with basic explanations of key concepts and theories, building toward more concrete, application-oriented examples that reveal the importance and impact of new technologies. This includes coverage of how satellites transfer voice, video, and other data across continents, as well as techniques used to obtain very-high-resolution images from space for use in agricultural and environmental sciences.This timely work employs a logical, practically structured approach that will help readers to better understand existing and emerging ICT and space technologies, including the most recent developments and achievements in the field.

From reader reviews:

Gustavo Cyr:

Here thing why this specific Information, Communication, and Space Technology are different and reputable to be yours. First of all studying a book is good nevertheless it depends in the content of the usb ports which is the content is as delicious as food or not. Information, Communication, and Space Technology giving you information deeper as different ways, you can find any reserve out there but there is no reserve that similar with Information, Communication, and Space Technology. It gives you thrill looking at journey, its open up your eyes about the thing which happened in the world which is might be can be happened around you. You can actually bring everywhere like in park, café, or even in your means home by train. When you are having difficulties in bringing the branded book maybe the form of Information, Communication, and Space Technology in e-book can be your choice.

Sheryl Vaughan:

Information, Communication, and Space Technology can be one of your starter books that are good idea. Most of us recommend that straight away because this reserve has good vocabulary which could increase your knowledge in language, easy to understand, bit entertaining but still delivering the information. The article author giving his/her effort to place every word into satisfaction arrangement in writing Information, Communication, and Space Technology yet doesn't forget the main place, giving the reader the hottest and based confirm resource info that maybe you can be one among it. This great information can drawn you into brand-new stage of crucial thinking.

Shawn Stoltzfus:

Many people spending their time frame by playing outside along with friends, fun activity with family or just watching TV the whole day. You can have new activity to shell out your whole day by examining a book. Ugh, do you think reading a book really can hard because you have to accept the book everywhere? It ok you can have the e-book, delivering everywhere you want in your Smartphone. Like Information, Communication, and Space Technology which is finding the e-book version. So , try out this book? Let's observe.

Darrel Mason:

You can find this Information, Communication, and Space Technology by look at the bookstore or Mall. Simply viewing or reviewing it could to be your solve problem if you get difficulties for ones knowledge. Kinds of this publication are various. Not only simply by written or printed but in addition can you enjoy this book by e-book. In the modern era just like now, you just looking from your mobile phone and searching what their problem. Right now, choose your current ways to get more information about your reserve. It is most important to arrange you to ultimately make your knowledge are still change. Let's try to choose proper ways for you.
