Elementary Matrix Algebra (Dover Books on Mathematics)

Franz E. Hohn

Elementary Matrix Algebra (Dover Books on Mathematics) Franz E. Hohn

This complete and coherent exposition, complemented by numerous illustrative examples, offers readers a text that can teach by itself. Fully rigorous in its treatment, it offers a mathematically sound sequencing of topics. The work starts with the most basic laws of matrix algebra and progresses to the sweep-out process for obtaining the complete solution of any given system of linear equations — homogeneous or nonhomogeneous — and the role of matrix algebra in the presentation of useful geometric ideas, techniques, and terminology.

Other subjects include the complete treatment of the structure of the solution space of a system of linear equations, the most commonly used properties of determinants, and linear operators and linear transformations of coordinates. Considerably more material than can be offered in a one-semester course appears here; this comprehensive volume by Franz E. Hohn, Professor of Mathematics at the University of Illinois for many years, provides instructors with a wide range of choices in order to meet differing interests and to accommodate students with varying backgrounds.

From reader reviews:

William Grimm:

In this 21st one hundred year, people become competitive in every single way. By being competitive today, people have to do something to make them survive, being in the middle of the crowded place and notice by means of surrounding. One thing that oftentimes many people have underestimated that for a while is reading. Yeah, by reading a publication your ability to survive raise then having chance to stand up than other is high. For you personally who want to start reading a book, we give you this particular Elementary Matrix Algebra (Dover Books on Mathematics) book as beginning and daily reading publication. Why, because this book is greater than just a book.

Ruth Barr:

As people who live in often the modest era should be upgrade about what going on or information even knowledge to make these people keep up with the era that is always change and make progress. Some of you maybe may update themselves by looking at books. It is a good choice for you but the problems coming to a person is you don't know what kind you should start with. This Elementary Matrix Algebra (Dover Books on Mathematics) is our recommendation to help you keep up with the world. Why, because this book serves what you want and need in this era.

Augusta Wilson:

This book untitled Elementary Matrix Algebra (Dover Books on Mathematics) to be one of several books which best seller in this year, that's because when you read this book you can get a lot of benefit on it. You will easily to buy this particular book in the book retail store or you can order it by way of online. The publisher with this book sells the e-book too. It makes you quickly to read this book, as you can read this book in your Smart phone. So there is no reason for your requirements to past this book from your list.

John Starr:

This Elementary Matrix Algebra (Dover Books on Mathematics) is great reserve for you because the content which can be full of information for you who else always deal with world and possess to make decision every minute. This book reveal it details accurately using great plan word or we can declare no rambling sentences within it. So if you are read the item hurriedly you can have whole data in it. Doesn't mean it only gives you straight forward sentences but challenging core information with attractive delivering sentences. Having Elementary Matrix Algebra (Dover Books on Mathematics) in your hand like keeping the world in your arm, data in it is not ridiculous one. We can say that no reserve that offer you world inside ten or fifteen tiny right but this publication already do that. So , this can be good reading book. Hey Mr. and Mrs. stressful do you still doubt which?
