**Cold Spray Technology** Anatolii Papyrin, Vladimir Kosarev, Sergey Klinkov, Anatolii Alkhimov, Vasily M. Fomin

The topic of this book is Cold Spray technology. Cold Spray is a process of applying coatings by exposing a metallic or dielectric substrate to a high velocity (300 to 1200 m/s) jet of small (1 to 50  $\mu\text{m}$ ) particles accelerated by a supersonic jet of compressed gas. This process is based on the selection of the combination of particle temperature, velocity, and size that allows spraying at the lowest temperature possible. In the Cold Spray process, powder particles are accelerated by the supersonic gas jet at a temperature that is always lower than the melting point of the material, resulting in coating formation from particles in the solid state. As a consequence, the deleterious effects of high-temperature oxidation, evaporation, melting, crystallization, residual stresses, gas release, and other common problems for traditional thermal spray methods are minimized or eliminated.

This book is the first of its kind on the Cold Spray process. **Cold Spray Technology** covers a wide spectrum of various aspects of the Cold Spray technology, including gas-dynamics, physics of interaction of high-speed solid particles with a substrate as well as equipment, technologies, and applications. **Cold Spray Technology** includes the results of more than 20 years of original studies (1984-2005) conducted at the Institute of Theoretical and Applied Mechanics of the Siberian Division of the Russian Academy of Science, as well as the results of studies conducted at most of the research centres around the world.

The authors' goal is threefold. The first goal is to explain basic principles and advantages of the Cold Spray process. The second goal is, to give practical information on technologies and equipment. The third goal is to present the current state of research and development in this field over the world.

The book provides coverage and data that will be of interest for users of Cold Spray technology as well as for other coating experts. At the present time the Cold Spray method is recognized by world leading scientists and specialists. A wide spectrum of research is being conducted at many research centres and companies in many countries.

- New approach to spray coatings
- Results are exceptionally pure coatings
- Low spray temperature without degradation of powder and substrate materials
- High productivity, high deposition efficiency
- High operational safety because of absence of high temperature gas jets, radiation and explosive gases.
- Excellent thermal and electrical conductivity
- Wide spectrum of applications because of important advantages of the process

### **From reader reviews:**

#### **Adrienne McGinnis:**

A lot of people always spent their own free time to vacation as well as go to the outside with them family or their friend. Did you know? Many a lot of people spent that they free time just watching TV, or playing video games all day long. If you need to try to find a new activity that's look different you can read any book. It is really fun for you personally. If you enjoy the book you read you can spent the whole day to reading a guide. The book Cold Spray Technology it doesn't matter what good to read. There are a lot of folks that recommended this book. We were holding enjoying reading this book. Should you did not have enough space to deliver this book you can buy often the e-book. You can m0ore effortlessly to read this book from your smart phone. The price is not too costly but this book has high quality.

#### **Shaun Richards:**

The reason? Because this Cold Spray Technology is an unordinary book that the inside of the reserve waiting for you to snap this but latter it will zap you with the secret that inside. Reading this book adjacent to it was fantastic author who also write the book in such amazing way makes the content inside of easier to understand, entertaining way but still convey the meaning completely. So , it is good for you because of not hesitating having this nowadays or you going to regret it. This book will give you a lot of rewards than the other book include such as help improving your skill and your critical thinking way. So , still want to hesitate having that book? If I were you I will go to the e-book store hurriedly.

#### **Teresa Hanson:**

Do you like reading a book? Confuse to looking for your preferred book? Or your book was rare? Why so many problem for the book? But virtually any people feel that they enjoy with regard to reading. Some people likes reading through, not only science book but in addition novel and Cold Spray Technology or others sources were given expertise for you. After you know how the good a book, you feel would like to read more and more. Science guide was created for teacher or maybe students especially. Those textbooks are helping them to include their knowledge. In other case, beside science book, any other book likes Cold Spray Technology to make your spare time more colorful. Many types of book like here.

#### **Ronald Griffin:**

What is your hobby? Have you heard this question when you got students? We believe that that issue was given by teacher with their students. Many kinds of hobby, Everybody has different hobby. And you know that little person including reading or as looking at become their hobby. You must know that reading is very important as well as book as to be the matter. Book is important thing to provide you knowledge, except your own personal teacher or lecturer. You find good news or update with regards to something by book. A substantial number of sorts of books that can you choose to adopt be your object. One of them is niagra Cold Spray Technology.
