Harmonic Analysis and Representation Theory for Groups Acting on Homogenous Trees (London Mathematical Society Lecture Note Series) Alessandro Figá-Talamanca, Claudio Nebbia

These notes treat in full detail the theory of representations of the group of automorphisms of a homogeneous tree. The unitary irreducible representations are classified in three types: a continuous series of spherical representations; two special representations; and a countable series of cuspidal representations as defined by G.I. Ol'shiankii. Several notable subgroups of the full automorphism group are also considered. The theory of spherical functions as eigenvalues of a Laplace (or Hecke) operator on the tree is used to introduce spherical representations and their restrictions to discrete subgroups. This will be an excellent companion for all researchers into harmonic analysis or representation theory.

From reader reviews:

Audrey Thompson:

Would you one of the book lovers? If yes, do you ever feeling doubt when you are in the book store? Make an effort to pick one book that you just dont know the inside because don't determine book by its handle may doesn't work at this point is difficult job because you are frightened that the inside maybe not because fantastic as in the outside look likes. Maybe you answer may be Harmonic Analysis and Representation Theory for Groups Acting on Homogenous Trees (London Mathematical Society Lecture Note Series) why because the amazing cover that make you consider with regards to the content will not disappoint a person. The inside or content will be fantastic as the outside or perhaps cover. Your reading sixth sense will directly guide you to pick up this book.

Victor Willis:

This Harmonic Analysis and Representation Theory for Groups Acting on Homogenous Trees (London Mathematical Society Lecture Note Series) is great book for you because the content which is full of information for you who also always deal with world and have to make decision every minute. This specific book reveal it info accurately using great plan word or we can declare no rambling sentences inside. So if you are read it hurriedly you can have whole facts in it. Doesn't mean it only offers you straight forward sentences but challenging core information with splendid delivering sentences. Having Harmonic Analysis and Representation Theory for Groups Acting on Homogenous Trees (London Mathematical Society Lecture Note Series) in your hand like finding the world in your arm, data in it is not ridiculous one particular. We can say that no publication that offer you world within ten or fifteen tiny right but this guide already do that. So , this is certainly good reading book. Hello Mr. and Mrs. stressful do you still doubt in which?

Shirley Henderson:

Many people spending their time by playing outside having friends, fun activity having family or just watching TV all day every day. You can have new activity to shell out your whole day by reading through a book. Ugh, you think reading a book will surely hard because you have to bring the book everywhere? It ok you can have the e-book, having everywhere you want in your Cell phone. Like Harmonic Analysis and Representation Theory for Groups Acting on Homogenous Trees (London Mathematical Society Lecture Note Series) which is having the e-book version. So , why not try out this book? Let's see.

James Fitzpatrick:

What is your hobby? Have you heard which question when you got learners? We believe that that issue was given by teacher with their students. Many kinds of hobby, Everybody has different hobby. And you know that little person such as reading or as looking at become their hobby. You have to know that reading is very important along with book as to be the point. Book is important thing to include you knowledge, except your

own personal teacher or lecturer. You get good news or update in relation to something by book. Amount types of books that can you decide to try be your object. One of them are these claims Harmonic Analysis and Representation Theory for Groups Acting on Homogenous Trees (London Mathematical Society Lecture Note Series).
