Machine Learning: The New AI (The MIT Press Essential Knowledge series) Ethem Alpaydin

Today, machine learning underlies a range of applications we use every day, from product recommendations to voice recognition -- as well as some we don't yet use everyday, including driverless cars. It is the basis of the new approach in computing where we do not write programs but collect data; the idea is to learn the algorithms for the tasks automatically from data. As computing devices grow more ubiquitous, a larger part of our lives and work is recorded digitally, and as "Big Data" has gotten bigger, the theory of machine learning -- the foundation of efforts to process that data into knowledge -- has also advanced. In this book, machine learning expert Ethem Alpaydin offers a concise overview of the subject for the general reader, describing its evolution, explaining important learning algorithms, and presenting example applications.

Alpaydin offers an account of how digital technology advanced from number-crunching mainframes to mobile devices, putting today's machine learning boom in context. He describes the basics of machine learning and some applications; the use of machine learning algorithms for pattern recognition; artificial neural networks inspired by the human brain; algorithms that learn associations between instances, with such applications as customer segmentation and learning recommendations; and reinforcement learning, when an autonomous agent learns act so as to maximize reward and minimize penalty. Alpaydin then considers some future directions for machine learning and the new field of "data science," and discusses the ethical and legal implications for data privacy and security.

From reader reviews:

Diana Chung:

As people who live in typically the modest era should be update about what going on or data even knowledge to make them keep up with the era which can be always change and move forward. Some of you maybe may update themselves by looking at books. It is a good choice to suit your needs but the problems coming to a person is you don't know what kind you should start with. This Machine Learning: The New AI (The MIT Press Essential Knowledge series) is our recommendation so you keep up with the world. Why, because book serves what you want and wish in this era.

Arlene Wilson:

Do you considered one of people who can't read satisfying if the sentence chained in the straightway, hold on guys that aren't like that. This Machine Learning: The New AI (The MIT Press Essential Knowledge series) book is readable by simply you who hate the perfect word style. You will find the information here are arrange for enjoyable reading through experience without leaving actually decrease the knowledge that want to provide to you. The writer associated with Machine Learning: The New AI (The MIT Press Essential Knowledge series) content conveys objective easily to understand by lots of people. The printed and e-book are not different in the information but it just different in the form of it. So , do you continue to thinking Machine Learning: The New AI (The MIT Press Essential Knowledge series) is not loveable to be your top collection reading book?

Dora Champagne:

Is it anyone who having spare time after that spend it whole day simply by watching television programs or just telling lies on the bed? Do you need something totally new? This Machine Learning: The New AI (The MIT Press Essential Knowledge series) can be the reply, oh how comes? A fresh book you know. You are consequently out of date, spending your spare time by reading in this brand new era is common not a nerd activity. So what these guides have than the others?

Robert Carroll:

With this era which is the greater man or who has ability in doing something more are more treasured than other. Do you want to become one among it? It is just simple method to have that. What you should do is just spending your time not much but quite enough to experience a look at some books. On the list of books in the top list in your reading list is actually Machine Learning: The New AI (The MIT Press Essential Knowledge series). This book and that is qualified as The Hungry Hillside can get you closer in becoming precious person. By looking up and review this reserve you can get many advantages.
