Research Methods in Practice: Strategies for Description and Causation Dahlia K. Remler, Gregg G. Van Ryzin

The **Second Edition** of **Research Methods in Practice: Strategies for Description and Causation** sets an entirely new standard for presenting and learning research methods. The perspective gained from this text makes it a truly necessary tool for such applied disciplines as public affairs and administration, public policy, psychology, urban affairs, education, sociology, social work, business, public health, political science, economics, communications and criminal justice.

Imbued with a deep commitment to make social and policy research methods accessible and meaningful, the **Second Edition** of **Research Methods in Practice: Strategies for Description and Causation** compels and inspires students to truly grasp the logic—and limits—of the latest research appearing in academic journals, government reports, and the media. Authors Dahlia K. Remler and Gregg G. Van Ryzin cover the most pertinent issues and methods, emphasizing the critical interpretation and practical application of research findings. Both causation and description—and the distinction between them—are emphasized and maintained thematically throughout the text. Concepts are taught through in-depth examples, such as “Fighting Malaria in Kenya,” “The U.S. Poverty Measure,” “The Fallout from Hurricane Katrina,” “Family Dinners and Teenage Substance Abuse,” and “The Effect of Poverty on Mental Health.” The realistic trade-offs, uncertainties, habits, and excitement of the research experience come through on every page.

“This is the best text available for teaching students the fundamentals of research design and statistics, and for introducing them to the difficulties inherent in evaluation research and causal inference.”

—**Dave E. Marcotte**, *University of Maryland, Baltimore County*
