## **Why Didn't I Learn This In High School?: Relevant Math For The Real World** David K. Suereth

Learn the math you need to know to survive in today's society. This includes basic math, banking, payroll with payroll expenses, taxes, insurance, credit cards, installment loans, savings, investing, and starting and running your own small business. This is a self help math mini textbook with sample problems and problem sets with answers. This book is based on a college math for business course. Even though algebra, geometry, trigonometry, and calculus certainly have their place in this world, the average person never really uses them. What has been neglected in traditional education is the teaching of interest rates, credit cards, investing, mortgages, taxes, savings, owning a small business, and other practical applications of mathematics. These items are usually learned by experience, often the hard way, and sometimes are never learned at all. This book is an attempt to teach the math necessary to comprehend the situations we all face in our jobs and daily lives.
