Thomas Henry Huxley

Science & Education (Forgotten Books) Thomas Henry Huxley

Essays on science in relation to education and thoughts on teaching.

About the Author

Thomas Henry Huxley (1825 - 1895)

Thomas Henry Huxley PC, FRS (4 May 1825 Ealing - 29 June 1895 Eastbourne, Sussex) was an English biologist, known as "Darwin's Bulldog" for his advocacy of Charles Darwin's theory of evolution.

Huxley's famous 1860 debate with the Lord Bishop of Oxford, Samuel Wilberforce, was a key moment in the wider acceptance of evolution, and in his own career. Wilberforce was coached by Richard Owen, against whom Huxley also debated on whether man was closely related to apes. Huxley was slow to accept some of Darwin's ideas, such as gradualism, and was undecided about natural selection, but despite this he was wholehearted in his public support of Darwin. He was instrumental in developing scientific education in Britain, and fought against the more extreme versions of religious tradition.

Huxley used the term 'agnostic' to describe his own views on religion, a term whose use has continued to the present day, and which throws light on his demanding criteria for proof in science (see Thomas Henry Huxley and agnosticism). (*Quote from wikipedia.org*)
